

ARECA Insurance Exchange Insurance Workshop

Utility Accident Investigation Training

6591 A. St., Anchorage or Microsoft Teams

October 14, 2022, 8 a.m. to 4:30 p.m.

This training is for all electric utility employees who might be involved in accident investigation. These employees include CEOs, safety managers, directors of operations, dispatch managers, line superintendents, and public relations personnel, among others. We've partnered with [Brooks, Jackson, Little & May, Consulting and Forensic Engineers](#), to bring this training our members.

Training outline:

- **Introduction:**
 - Purpose for Incident/Accident Investigations
 - Tools for the investigator
 - Witness Statements
- **System Protection:**
 - Fuses, Circuit Breakers, Relays, SCADA, etc.
- **National Electrical Safety Code:**
 - NESC Application to Investigations
- **Sag and Tension**
- **Investigation Pre-Planning**
- **Fire Investigations**
- **Measurement Techniques**
- **Photography Techniques**
- **Evidence Collection/Preservation**
- **Table-Top Exercise:**
 - Detail review of an actual investigation start to finish.
- **Case Studies:**
 - Review several different actual investigations
